

Welcome to Jekyll!

Dec 12, 2014

You'll find this post in your `_posts` directory. Go ahead and edit it and re-build the site to see your changes. You can rebuild the site in many different ways, but the most common way is to run `jekyll serve`, which launches a web server and auto-regenerates your site when a file is updated.

To add new posts, simply add a file in the `_posts` directory that follows the convention `YYYY-MM-DD-name-of-post.ext` and includes the necessary front matter. Take a look at the source for this post to get an idea about how it works.

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Ducimus, officiis, corporis! Odit quaerat nihil sed doloremque magnam. Soluta dignissimos dolorum necessitatibus consectetur hic ipsam vel, laudantium aperiam quidem eligendi velit.

Ipsum iure ducimus quam incidunt nostrum minima quos provident, possimus, corporis libero nisi magni eligendi, voluptate ipsam eius, expedita consequuntur. Fugit nulla commodi eius incidunt quae quisquam id sequi aut.

Voluptates non vitae sunt, excepturi expedita aperiam veritatis. Unde quam sit, modi possimus ipsum quos, dolorum sint eveniet. Sed magnam iure voluptatibus sunt accusamus qui error. Qui odit, praesentium libero.

Jekyll also offers powerful support for code snippets:

```
def print_hi(name)
  puts "Hi, #{name}"
end
print_hi('Tom')
#=> prints 'Hi, Tom' to STDOUT.
```

Check out the [Jekyll docs](#) for more info on how to get the most out of Jekyll. File all bugs/feature requests at [Jekyll's GitHub repo](#). If you have questions, you can ask them on [Jekyll's dedicated Help repository](#).
